

Visible hinge

Safety and durability

The visible hinge is a classic and timeless solution for any type of door you may choose.

Hidden hinge

Comfort and convenience are perfectly combined with minimal aesthetics and flat looks.

The hidden hinge doesn't interfere with the design of your door and offers a high level of security.

GEZE Activestop

Recall mechanism with movement stabilizer. Stops the movement of the door gently without any noise or keeps it steady effortlessly.

Bioreader

Device that reads your fingerprint. Bioreader is both practical and modern.

Suits any entrance door

Bluetooth

The bluetooth device gives you the option to lock your door with your phone. When your phone is inside the device's range you press the central button to unlock the door.

Touchpad

The touchpad gives you the option to lock or unlock your entrance door with your own personal code. The discreet led light helps during the night.
